Tautvydas Bliūdžius

1998-07-14

I am currently enrolled in Codecademy's frontend courses for beginners. The courses started in December 2022 and are scheduled to end in August of this year. So far, I have completed the CSS, HTML and JavaScript modules and I am currently learning React.

In addition, I have previously attended object programming lectures at Kaunas University of Technology, which has provided me with a foundational knowledge of programming.

Despite my prior experience, I was pleasantly surprised by how strongly web development resonated with me during the Codeacademy's course. Each evening of lecture presents a new and exciting challenge, which I eagerly embrace.

I am currently employed as an engineer-constructor at "Kaunas Metal." However, my strong desire to pursue programming has motivated me to expand my knowledge and skill set in this field. My ultimate goal is to become a proficient frontend developer and contribute to the industry.

Education

Multimedia Technologies
2017-2018
Kaunas University of Technology

Aviation Engineering
2018-2022
Kaunas University of Technology

Skills

AutoCAD
SolidWorks
Adobe -Premiere/Illustrator
